Keyboard Play

Though we recommend using a mouse, *Betrayal at Kronador* can also be played using your keyboard. Hold down the [Alt] key and move your cursor around the screen using either the arrows on the numeric keypad (8 up, 2 down, 4 left, 6 right), or by using the four directional arrows. This mode emulates mouse functions, with the 5 or 0 keys being equivalent to a left click, and the + key working as a right click. You can also use the [Enter] key to emulate a left mouse click on some screens.

There is a second mode available by holding down the [Ctrl] key instead of [Alt]. The cursor will now jump from hotspot to hotspot in response to directional key presses.
