# Prologue

It was Richter Belmont, the legendary vampire hunter, who succeeded in finally ending the menace of Count Dracula, Lord of the Vampires who had been brought back from the grave by the dark priest Shaft.

However, one night 4 years later, under the glare of a full moon, Richter mysteriously vanished.

With no idea of where to begin her search, Maria Renard set out to look for him. It was then that fate intervened. Castlevania, the castle of Dracula, which is rumored to appear once every century, suddenly materialized from out of the mist as if to show her the way.

Meanwhile, powerful forces were struggling for the soul of a man named Alucard. The very same Alucard who had teamed up with Trevor Belmont to battle his immortal father, Count Vlad Tepes Dracula.

Alucard, in order to purge the world of his own cursed blood line, had submerged his vampiric powers and entered into what was supposed to be an eternal slumber. But now, he is awake and aware of the evil once again at work in his homeland.

The time has once again come for the forces of Good and Evil to engage in their ancient battle. Dracula's castle beckons you...

And no man can say who shall emerge victorious.

# Characters

## Alucard

(Real name: Adrian Farenheights Tepes)

Age: Estimated to be 400 years old

The offspring of an unnatural union between Count Dracula and a human woman, Alucard possesses inhuman strength and dark magical powers. His weapon of choice is a sword, and he uses a variety of them to serve his needs. He is an adept shapeshifter, commonly using the forms of wolf, bat and mist to confuse and terrify his opponents. Alucard also relies heavily on ancient relics and magical items to perform elaborate magical attacks.

## Richter Belmont

Age: 24

Every generation of the Belmont clan has produced tougher, more dedicated vampire hunters—yet Richter stands above all others. Brandishing the legendary sacred whip which so many of his predecessors wielded, this hot-blooded youth pushed Dracula to the brink. Then, with an almost indestructible will to survive and emerge victorious, Richter defeated Dracula in a massive battle five years ago. However, he has been missing for a year—vanishing mysteriously under the light of a full moon.

## Maria Renard

Age: 17

As Richter's sister-in-law, Maria is not a Belmont by blood, but she has the fiery determination of a vampire hunter coursing through her veins. She aided Richter five years ago in the defeat of Dracula, and has vowed to find him now that he has vanished. Shortly after beginning her search, however, the ancient Castlevania returned to the earthly plane. Fearlessly, she entered the castle alone.

## Death

This evil spirit is an ally of Dracula's, which should come as a surprise to no one familiar with the Count's nocturnal activities.

## Master Librarian

He is the keeper of the library in Dracula's castle. He has accumulated a wealth of knowledge over the centuries, and some special items, as well, which he will part with-for a price.

## Count Dracula

(Real name: Dracula Vlad Tepes)

Age: Estimated to be 800 years old

He has been known by many names through the ages, but no matter what you choose to call him, one truth remains: he is the embodiment of all that is dark and evil. He is father of Alucard and master of Castlevania the dark castle steeped in terror and black magic. It is said to appear on the human plane of existence once every 100 years. Though Richter destroyed Castlevania and its evil landlord five years ago, it has reappeared without warning.

## Lisa

Alucard's mother and Dracula's wife. She is the only woman Dracula has ever loved, yet for some reason he had chosen not to take away her human form and bring her over to the dark ranks of the vampire. She was a good, kind-hearted soul who was mistakenly executed as a witch for preparing medicine to help the sick.

## Rules

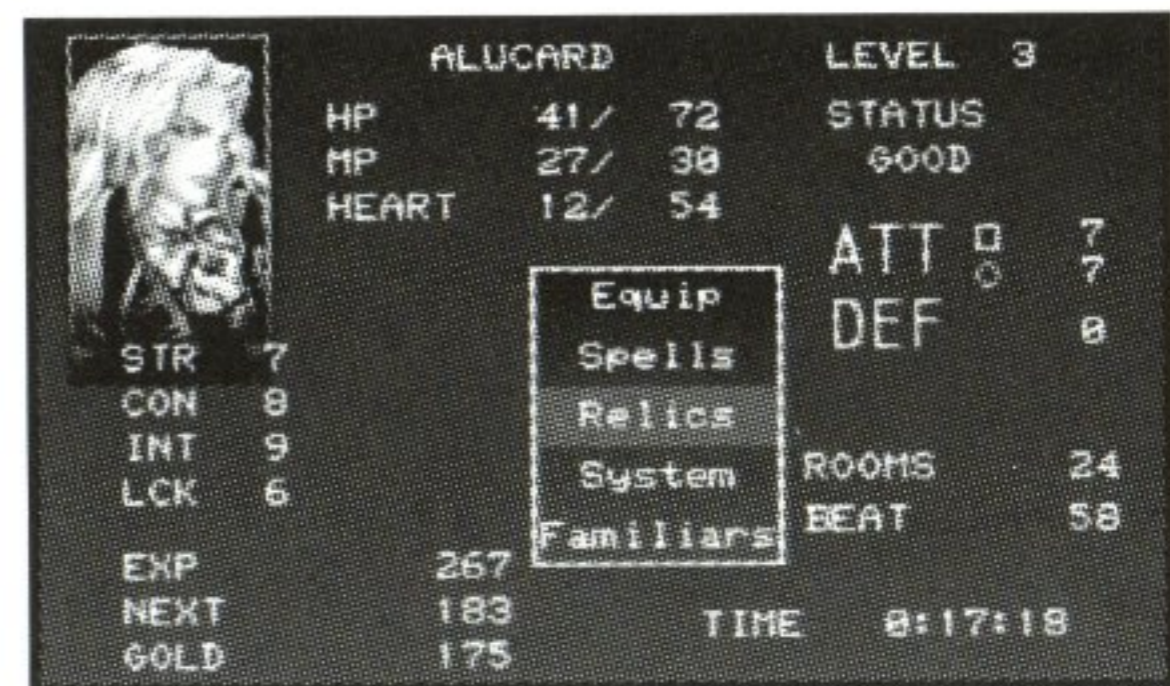

You are Alucard. Raging through you is the hunger and bloodlust of your vampire father, and the gentle, empathetic compassion of your human mother. As you have tried to come to terms with that constant internal struggle, you have recognized an outer struggle as well—the need to destroy Castlevania and bury the demons both within the castle and within your soul.

On your mission, you will discover ancient relics that will open new paths to you. Hidden weapons and magical items from a time long forgotten will be uncovered. Some weapons and items have restricted use—you must earn “hearts” to enable them. As your quest continues, you will encounter myriad monsters and dark forces who will challenge your progress. Every victory gives you experience, which yields power and strength. Gradually, you will be able to face and defeat stronger and stronger foes. When you receive damage, you lose some of your life force. Because you are half human, you can be defeated more easily than your father. If your life drains to zero, the Start screen will reappear, and (if you have saved a game in progress) you can resume play from the last saved location.

## ○+□ buttons

These represent the Left and Right hands of Alucard. Each hand can be equipped separately. For example: a sword can be equipped in one hand and a shield in the other. Some items require both hands so you will not be hold anything else when using these items. Certain items like the shuriken are expendable and can only be used once. Items such as food and medicine must be equipped and used by pressing the appropriate button.

## Types of weapons

### ① Fist weapons

### ③ Swords

Basic single handed swords.

Some enemies are easier to defeat with these types of weapons.

Some equipment can work together to create a tremendous special attack. Experiment with different combos when acquiring new items.

\*There are many other items; these are just a few of them.

## Relics

Relics are items that let you use special powers and effects. They are hidden in various rooms throughout the castle. There are some rooms you cannot enter unless you obtain a particular relic. When you obtain a relic, go to "Relics" in the Sub screen and check whether it is ON/OFF and what effect it has. If a relic is set to OFF it will have no effect.

You will need to use some of your "hearts" to use these weapons. The number of hearts needed depends on the weapon

Certain weapons have an additional effect when attacking enemies. Some effects such as Fire, Ice or Poison may do additional damage.

# Spells

The ancient castle has been used for dark purposes for eons. The magic contained inside it is powerful. You may learn some of the spells during your quest. Casting the spells is a trial and error process. Use the SPELLS sub-menu (in the Character Status screen) to select spells. Casting them consumes magic power, but not "hearts". Spells are not necessary to accomplish your mission, but they may make some tasks easier.

## Status

Alucard may suffer the following effects when hit by special enemy attacks.

## Selecting systems

You can reconfigure various settings by accessing the SYSTEM sub-menu (in the Character Status screen). The new settings will be saved automatically the next time you save your progress.
